Let us welcome you home in style.

FIBERGLASS DOORS AND SIDELIGHTS

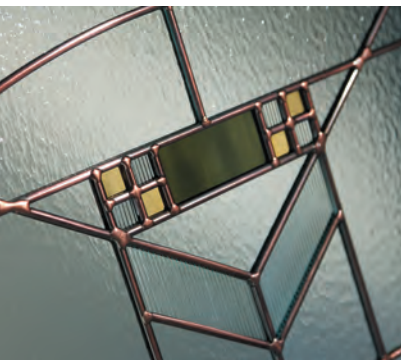

Engineered to last a lifetime

- Proprietary, high-performance fiberglass doors are specially engineered to provide maximum protection and durability.
- Looks like real wood and insulated 5X better, based on insulating characteristics of polyurethane foam core compared to wood.
- Available in mahogany, oak and fir woodgrain textures or a smooth finish.
- Smooth can be painted, and textured is best stained.
- Ideal for coastal applications.
- Will not dent or rust, plus resists splitting, cracking and warping.
- Square-edge, engineered styles provide excellent dimensional stability for harsh weather climates.
- Reinforced lock block provides strength and security for door hardware.
- High-quality composite wood bottom rails are rot and corrosion resistant.
- Backed by a Limited Lifetime Warranty.

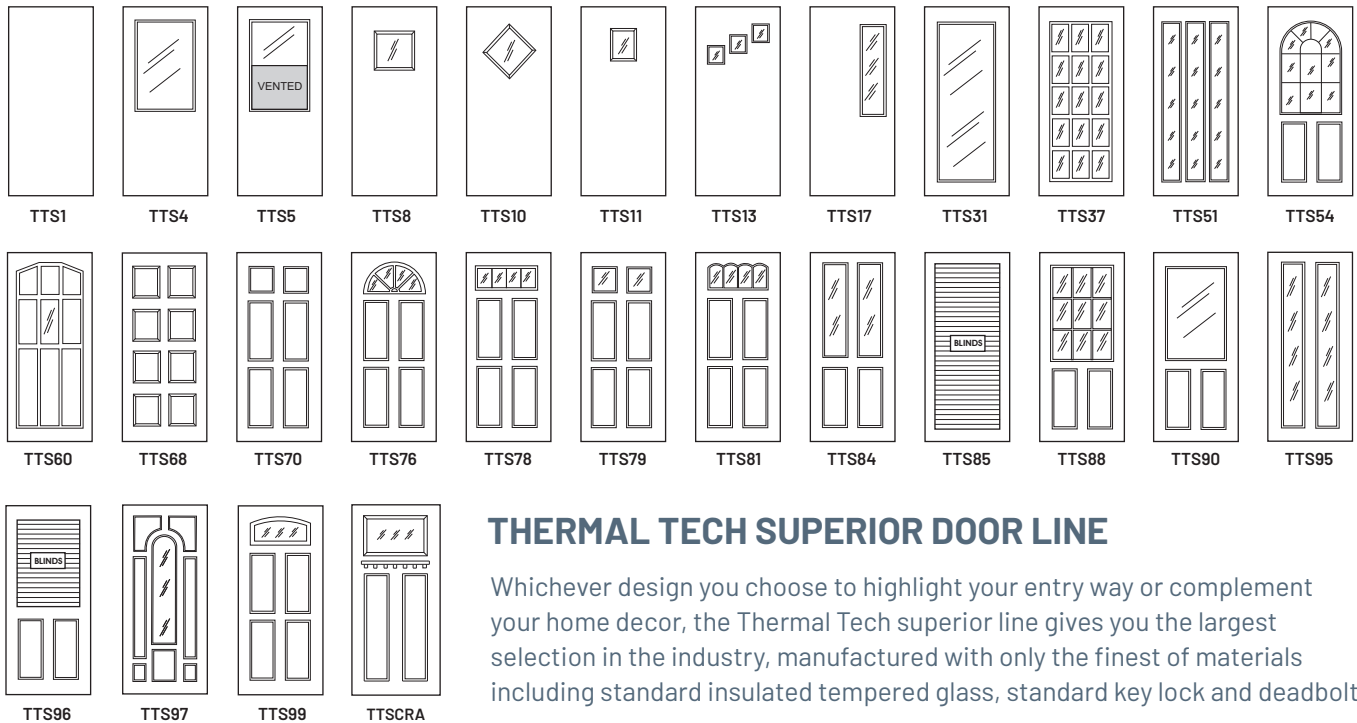

WELCOMING ENTRIES

We design doors
for every home
and every
individual style.

THERMAL TECH SUPERIOR DOOR LINE

Whichever design you choose to highlight your entry way or complement your home decor, the Thermal Tech superior line gives you the largest selection in the industry, manufactured with only the finest of materials including standard insulated tempered glass, standard key lock and deadbolt.

DOOR FINISHES

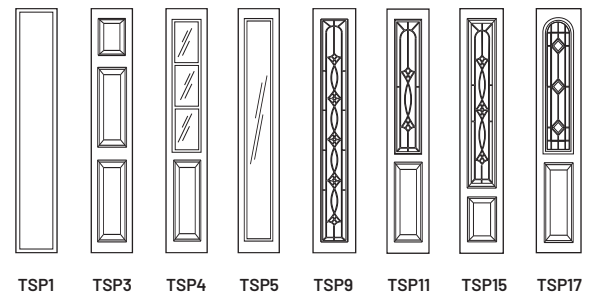

- All of our steel doors are pre-finished with a variety of colors that consist of six coats from prime to top coat.
- A variety of woodgrain stains are available for many door styles.
- Our fiberglass doors are pre-finished in a variety of real traditional Jel coat stain or painted.

COLORS

SIDELIGHTS AND PANELS

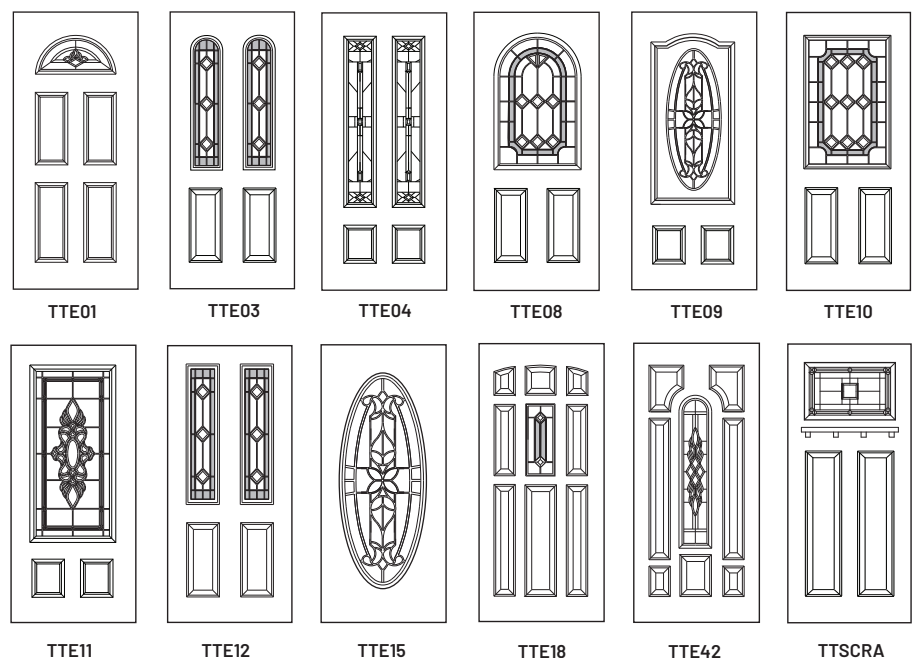

Matching sidelights are available for all models.

THERMAL TECH EXQUISITE DOOR LINE

This product is the ultimate in a truly outstanding entrance door manufactured with custom decor materials and can be highlighted with deluxe high grade hardware.

Insulated tempered glass and single cylinder deadbolt standard on all doors.

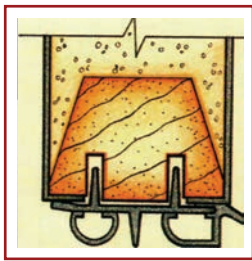

THERMAL TECH FIBERGLASS AND STEEL DOORS

THE UNIQUE DIFFERENCE IS IN THE DETAILS

Fiberglass entrance systems are the perfect complement to your home. They add depth and dimension, while being low maintenance and energy-efficient. They are engineered for durability and longevity, and provide maximum protection.

TRIPLE CONTACT BOTTOM SWEEP WITH DRIP CAP

Twin compression tubes and extruded vinyl sweep-blade made with threshold to seat door bottom and prevent major energy loss. No leaks, drafts, ice build-up.

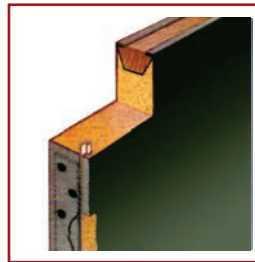

STEEL SECURITY PLATES

Steel security plates are available for all doors, to provide enhanced security for your home. These provide additional protection against home intruders to keep you and your family safe.

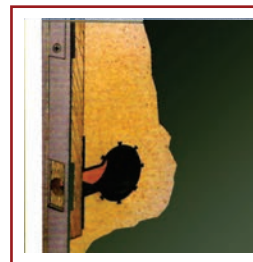

POLYURETHANE CORE

No voids, no hollow spots. R-15 insulating value is five times better than wood doors; nearly twice that of polystyrene doors! Saves energy in winter and summer.

12 - GAUGE HINGE REINFORCED

Plate riveted within the door, which eliminates sags.

REINFORCED LOCK PREPARATION

Provides rigid base for locksets. Discourages intruders. For use with all frames and types of security hardware.

RIGID STEEL SKINS

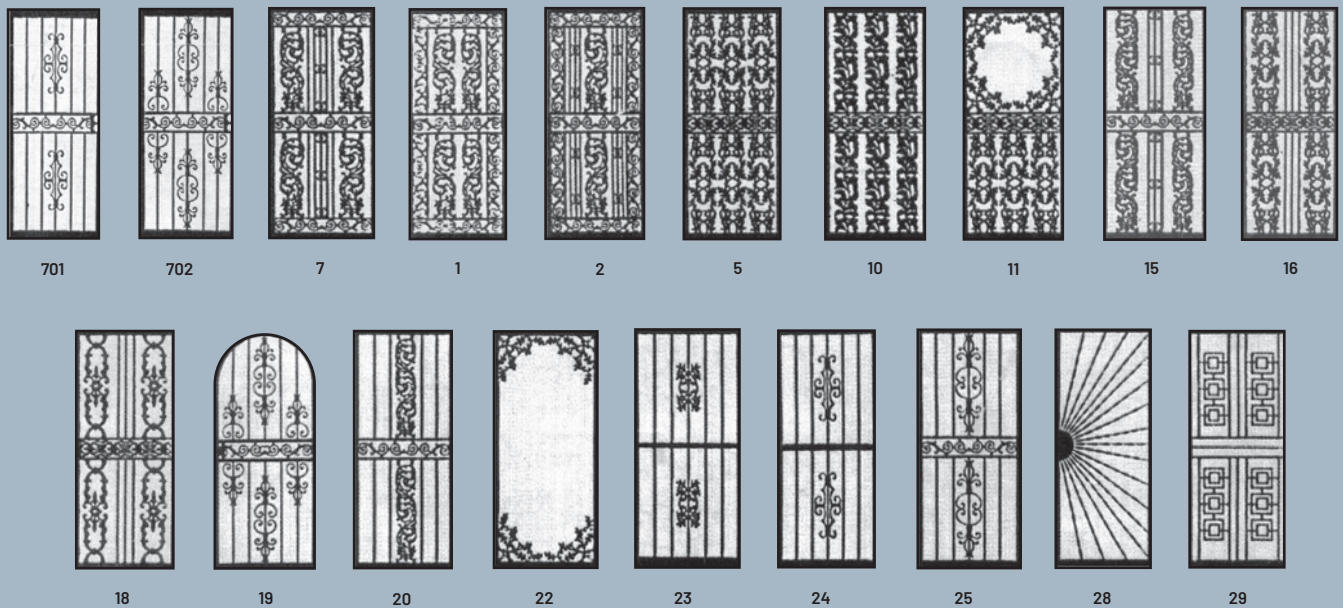

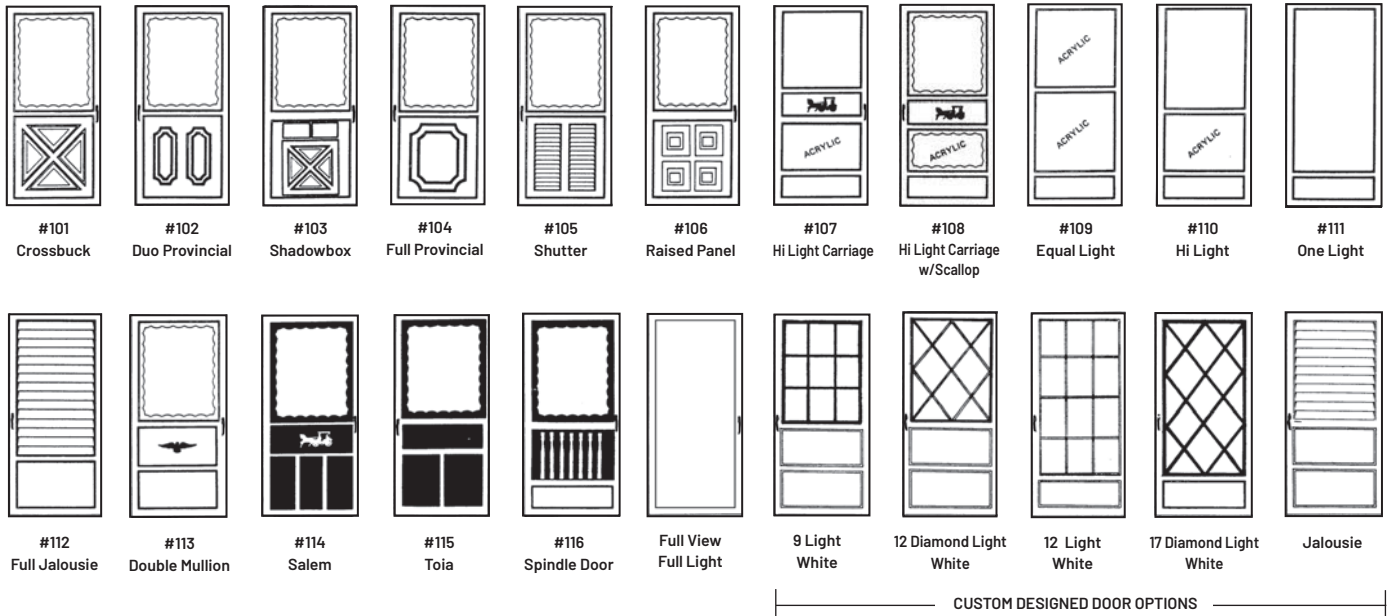

Strong and secure! Won't warp, sag, shrink or swell like wood doors. Rust-free service provided by 24-gauge galvanized steel.

PROTECT YOUR HOME WITH STEEL SECURITY STORM DOORS

ALUMINUM STORM DOORS

CUSTOM DESIGNED DOOR OPTIONS AVAILABLE

- Steel security storm doors are constructed of 2x1 heavy gauge steel all around and center. The bars are 1/2" solid steel.
- All doors are equipped with full plexiglass, or optional tempered glass, top screen heavy duty lock and deadbolt.
- All models featured above are available sized to order.
- No charge for different colors.

THERMAL TECH WINDOWS

Custom Made Quality Construction

Thermal Tech manufactures a complete line of windows. All of our windows are fully welded, both the sash and the frame. Our windows are constructed of white or brown reinforced rigid vinyl frames with double glazing. All windows are custom made with head and seat boards and jambs installed, ready to attach inside moldings.

HEAD AND SEAT BOARD - Constructed of 1¼" high quality exterior plywoods.

WEATHER STRIPPING - Double sealed to lock out weather and noise.

HARDWARE - Highest quality concealed hinges and operators. Sash locks operate in tandem with concealed tie bar. Single lever multi-point locking system.

INTERLOCKS - Which is part of the frame, is effective against air infiltration, water, dust and noise.

MULTI CHAMBERS - Add insulation value. Air pockets create thermal efficiency, reducing heat loss and condensation on frames is virtually eliminated.

GLAZING - Full 7/8" thick, double glazing. Optional Low E Glass and Argon Gas for sun protection and insulation.

WELDED MASTER FRAME - Extruded rigid PVC multi-chambered for strength and insulation

WELDED SASH - Dual-durometer extrusion eliminates glazing spline

SCREENS - Full baked color coordinated aluminum frames with fiberglass insect screening.

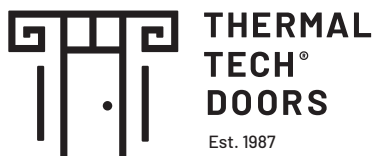

THERMAL TECH WINDOW STYLES:

Double Hung • Casement • Two Lite Slider
Three Lite Slider • Dead Lite • Picture
Bay • Bow • Hopper • Awning • Garden

We open the door to endless possibilities.

Choose from an extensive collection of hardware and glass adding a distinctive touch to any door, while keeping your home safe and secure.
